10. UNITED STATES TAX CONSIDERATIONS

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

Classification for U.S. Tax Purposes

We have determined that there is a material risk that the Certificates will not be treated as a debt instrument, but will rather be treated as a forward or derivative contract, for United States federal income tax purposes. In light of this possibility, we intend to treat the Certificates in the manner described under "*United States Tax Considerations – Securities Issued by GSF CI – Securities that are not Classified as Debt for United States Tax Purposes*" in the Base Prospectus. If the Certificates bear periodic coupons, then, due to uncertainty regarding the U.S. withholding tax treatment of coupon payments on Certificates that are not treated as debt, it is expected that withholding agents will (and we, if we are the withholding agent, intend to) withhold on coupon payments on the Certificates at a 30 per cent. rate or at a lower rate specified by an applicable income tax treaty under an "other income" or similar provision. No additional amounts will be paid for such withholding tax by us or by the applicable withholding agent. Amounts paid upon the redemption or maturity of the Certificates (other than any periodic coupons that are paid at such time) are not expected to be subject to U.S. withholding tax and, if we (including any of our affiliates) are the withholding agent, we do not intend to withhold on such amounts. You should consult your own tax advisor regarding the U.S. tax consequences of purchasing, holding and disposing of the Certificates.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer and Guarantor. The Securities are the Issuer's unsecured obligations and the Guarantee is the Guarantor's unsecured obligation. Investors are dependent on the Issuer's and Guarantor's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's and Guarantor's credit risk and to changes in the market's view of the Issuer's and Guarantor's creditworthiness. Neither the Securities nor the Guarantee are bank deposits, and neither are insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's and the Guarantor's ability to fulfil their obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market developments and general business environment risks.
- GSFCI is a wholly-owned subsidiary of the Goldman Sachs group. GSFCI is primarily involved in issuing securities, lending and entering into derivatives transactions with its affiliates for hedging purposes, and does not carry out any other operating business activities. As a result, GSFCI does not have a significant amount of share capital. Investors are exposed to a significantly greater credit risk by purchasing the Securities where GSFCI is the Issuer than they would be by purchasing securities from an issuer equipped with significantly more capital. If GSFCI becomes insolvent, investors may lose some or all of the amount invested.

Qualifications in audit report on historical financial information: Not applicable; there are no qualifications in the audit report of GSG on its historical financial information.

Risk factors associated with the Guarantor:

- GSG is the parent holding company of the group of companies comprising Goldman Sachs. Goldman Sachs is a leading global investment banking, securities and investment management firm that faces a variety of significant risks which may affect GSG's ability to fulfil its obligations under the Securities, including market risks, liquidity risks, credit risks, operational risks, legal and regulatory risks, competition risks and market developments and general business environment risks.
- Investors are exposed to the credit risk of GSG and its subsidiaries since the assets of GSG consist principally of interests in its subsidiaries. GSG's right as a shareholder to benefit in any distribution of assets of any of its subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. As a result, investors' ability to benefit from any distribution of assets of any of GSG's subsidiaries upon the subsidiary's liquidation or otherwise, is junior to the creditors of GSG's subsidiaries. Any liquidation or otherwise of a subsidiary of GSG may result in GSG being liable for the subsidiary's obligations which could reduce its assets that are available to satisfy its obligations under the guarantee.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

- The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.
- The market price of your Securities prior to maturity may be significantly lower than the purchase price you pay

for them. Consequently, if you sell your Securities before the stated scheduled redemption date, you may receive far less than your original invested amount.

- Your Securities may be redeemed in certain extraordinary circumstances set out in the conditions of the Securities prior to scheduled maturity and, in such case, the early redemption amount paid to you may be less than the amount you paid for the Securities and might be zero.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap. Therefore, your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the price of an Underlying Asset may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you may receive no interest payments and/or could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.

Quali sono i principali rischi che sono specifici per l'Emittente?

L'Emittente è soggetto ai seguenti rischi principali:

- Il pagamento di qualsiasi importo dovuto sugli Strumenti Finanziari è soggetto al rischio di credito dell'Emittente e del Garante. Gli Strumenti Finanziari sono obbligazioni non garantite dell'Emittente e la Garanzia è un'obbligazione non garantita del Garante. Gli investitori dipendono dalla capacità dell'Emittente e del Garante di versare tutti gli importi dovuti sugli Strumenti Finanziari, e pertanto gli investitori sono soggetti al rischio di credito dell'Emittente e del Garante e ai cambiamenti nella visione di mercato del merito di credito dell'Emittente e del Garante. Né gli Strumenti Finanziari né la Garanzia costituiscono depositi bancari, e non sono assicurati o garantiti da alcuno schema di protezione di

compensazione o deposito. Il valore e il rendimento sugli Strumenti Finanziari saranno soggetti al rischio di credito dell'Emittente e ai cambiamenti nella visione di mercato del merito di credito dell'Emittente.

- GSG e le sue controllate consolidate ("**Goldman Sachs**") costituiscono un gruppo leader mondiale nell'investment banking, nei titoli e nella gestione degli investimenti e fanno fronte ad una varietà di rischi significativi che potrebbero pregiudicare la capacità dell'Emittente e del Garante di adempiere ai propri obblighi relativi agli Strumenti Finanziari, inclusi i rischi di mercato, rischi di liquidità, rischi di credito, rischi operativi, rischi legali e regolamentari, rischi di concorrenza e sviluppi di mercato e rischi generali del contesto aziendale.
- GSFCI è una controllata al 100% del gruppo Goldman Sachs. GSFCI si occupa principalmente dell'emissione di strumenti finanziari, del prestito e della stipula di contratti derivati con le sue società controllate, collegate o sottoposte a comune controllo a scopo di copertura e non svolge altre attività operative. Di conseguenza, GSFCI non dispone di un capitale sociale di rilevante entità. Gli investitori sono esposti a un rischio di credito significativamente maggiore acquistando gli Strumenti Finanziari in cui GSFCI è l'Emittente di quanto lo sarebbero acquistando titoli da un emittente dotato di un capitale significativamente maggiore. Se GSFCI diventa insolvente, gli investitori possono perdere una parte o la totalità dell'importo investito.

Fattori di rischio associati al Garante:

- GSG è la holding del gruppo di società che comprende Goldman Sachs. Goldman Sachs è una società leader a livello mondiale nel settore dell'investment banking, dei titoli e della gestione degli investimenti, che si trova ad affrontare una serie di rischi significativi che possono influire sulla capacità di GSG di adempiere ai propri obblighi in materia di titoli, compresi i rischi di mercato, i rischi di liquidità, i rischi di credito, i rischi operativi, i rischi legali e normativi, i rischi di concorrenza e sviluppi di mercato e i rischi generali del contesto aziendale.
- Gli investitori sono esposti al rischio di credito della GSG e delle sue controllate in quanto il patrimonio della GSG è costituito principalmente da partecipazioni nelle sue controllate. Il diritto di GSG, in qualità di azionista, di beneficiare di qualsiasi distribuzione del patrimonio di una delle sue controllate in caso di liquidazione della controllata o in altro modo è subordinato ai creditori delle controllate di GSG. Di conseguenza, la capacità degli investitori di trarre vantaggio da qualsiasi distribuzione di attività di una qualsiasi delle controllate di GSG al momento della liquidazione della controllata o in altro modo è subordinata ai creditori delle controllate di GSG. La liquidazione o meno di una controllata della GSG può comportare la responsabilità della GSG per gli obblighi della controllata, il che potrebbe ridurre i suoi attivi disponibili per soddisfare gli obblighi derivanti dalla garanzia.

Quali sono i rischi principali che sono specifici per gli Strumenti Finanziari?

Fattori di rischio associati agli Strumenti Finanziari: Gli Strumenti Finanziari sono soggetti ai seguenti principali rischi:

- Il valore ed il prezzo stimato dei Vostri Strumenti Finanziari (se del caso) in qualsiasi momento dipenderanno da molti fattori e non potranno essere prevedibili. A seconda dell'andamento dell'Attività Sottostante, Lei potrebbe subire la perdita di una parte o della totalità del suo investimento.

- Il prezzo di mercato degli Strumenti Finanziari prima della scadenza può essere significativamente inferiore al prezzo di acquisto pagato. Di conseguenza, se vendete i vostri Strumenti Finanziari prima della data di regolamento prevista, potreste ricevere molto meno dell'importo investito inizialmente.
- I vostri Strumenti Finanziari possono essere regolati in determinate circostanze straordinarie indicate nelle condizioni degli Strumenti Finanziari prima della scadenza prevista e, in tal caso, l'importo di regolamento anticipato pagato a voi potrebbe essere inferiore all'importo che avete pagato per gli Strumenti Finanziari e potrebbe essere pari a zero.

Rischi relativi a determinate caratteristiche degli Strumenti Finanziari:

- I termini e le condizioni dei suoi Strumenti Finanziari prevedono che gli Strumenti Finanziari siano soggetti ad un *cap*. Per questo motivo, la vostra capacità di partecipare in qualsiasi cambiamento nel valore delle Attività Sottostanti per tutta la durata degli Strumenti Finanziari sarà limitata, a prescindere da quanto il prezzo di un' Attività Sottostante sia superiore al livello del *cap* nel corso di vita degli Strumenti Finanziari. Di conseguenza, il rendimento sui Vostri Strumenti Finanziari potrebbe essere significativamente inferiore a quello che sarebbe stato se avesse acquistato direttamente le Attività Sottostanti.
- I termini e le condizioni dei suoi Strumenti Finanziari prevedono che il rendimento sugli Strumenti Finanziari dipende dalla performance *'worst-of'* del paniere delle Attività Sottostanti. Per questo motivo, lei sarà esposto alla performance di ciascuna Attività Sottostante e, in particolare all'Attività Sottostante con andamento peggiore. Ciò significa che, a prescindere dalla performance delle altre Attività Sottostanti, se una o più Attività Sottostanti non rispettano la relativa soglia o barriera per il pagamento degli interessi o il calcolo di qualsiasi importo di rimborso, lei potrebbe non ricevere il pagamento degli interessi e/o potrebbe perdere una parte o la totalità del suo investimento iniziale.

Rischi relativi alle Attività Sottostanti:

- *Il valore ed il rendimento dei Vostri Strumenti Finanziari dipendono dall'andamento delle Attività Sottostanti:* Il rendimento dei Vostri Strumenti Finanziari dipende dall'andamento di una o più Attività Sottostanti. Il prezzo di un'Attività Sottostante può essere soggetto nel tempo a modifiche imprevedibili. Questo grado di cambiamento è noto come "volatilità". La volatilità di un'Attività Sottostante può essere condizionata da eventi nazionali ed internazionali di natura finanziaria, politica, militare o economica, incluse azioni governative, o da azioni da parte dei partecipanti al mercato rilevante. Uno qualunque di questi eventi o azioni può influenzare negativamente il valore ed il rendimento degli Strumenti Finanziari. La volatilità non implica una direzione del prezzo di un'Attività Sottostante, anche se un'Attività Sottostante che è più volatile è più probabile che aumenti o diminuisca di valore più spesso e/o in misura maggiore rispetto ad una che è meno volatile.
- *L'andamento passato di un'Attività Sottostante non è indicativo dell'andamento futuro:* Non dovete considerare informazioni relative all'andamento passato di un'Attività Sottostante come indicative del *range*, delle tendenze, o di fluttuazioni delle Attività Sottostanti nelle Attività Sottostanti che possano verificarsi in futuro. Le Attività Sottostanti possono avere un andamento diverso (o uguale) rispetto al passato, e ciò può avere un significativo effetto negativo sul valore e sul rendimento dei Vostri Strumenti Finanziari.
- L'andamento delle Azioni dipende da fattori macroeconomici, come i livelli di interesse e prezzo sui mercati dei capitali, sviluppi valutari, fattori politici così come fattori specifici relativi alle società quali utili, posizione di mercato, situazione di rischio, struttura azionaria e politica di distribuzione, così come pure rischi di *business* cui sono esposti i relativi emittenti. Uno qualsiasi di tali fattori o una loro combinazione possono influenzare negativamente l'andamento delle Attività Sottostanti che, a sua (loro) volta, avrebbero un effetto negativo sul valore e sul rendimento dei vostri Strumenti Finanziari.
